DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 851,059 to Broome.

Broome discloses a gathering and picking device including:

- a gathering element (device with arms 42), which is rotated about an approximately vertical rotation axis
- a picking gap (between 38 and 39) that is curved along an effective length

The picking gap is an essentially constant distance from the rotational axis of the gathering element (Fig. 1).

Regarding claim 2, the gathering element is provided with finger (42), which are oriented substantially perpendicular to the effective length of the picking gap when they pass through the picking gap.

Regarding claim 3, the picking gap has an end region (Fig. 1), which is spaced a greater distance from the rotational axis than the distance to the effective length.

Allowable Subject Matter

3. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
